PARAMESWARI MANTHIRAMOORTHI

Data Analyst | Business Analyst | Junior Data Scientist

+971 52 952 7048 | Abu Dhabi, UAE | mlparameswari@gmail.com | LinkedIn | GitHub | Portfolio

Immediately Available | Open to Relocation – Bangalore

PROFESSIONAL SUMMARY

Results-driven Data Analyst and aspiring Data Scientist with hands-on experience in data analytics, business intelligence, machine learning, and statistical analysis. Proficient in Python, SQL, Power BI, Excel, and data visualization tools. Experienced in building predictive models, KPI dashboards, and performing exploratory data analysis (EDA) across banking, healthcare, e-commerce, HR, and marketing domains. Strong analytical mindset with the ability to translate business requirements into actionable insights that support data-driven decision-making.

CORE COMPETENCIES

- Data Analysis & Exploratory Data Analysis (EDA)
- Business Intelligence & Dashboard Development
- Machine Learning & Predictive Modeling
- SQL Querying & Database Management
- Statistical Analysis & Hypothesis Testing
- ETL (Extract, Transform, Load)
- KPI Tracking & Performance Analysis
- Data Cleaning & Data Wrangling
- Stakeholder Reporting & Data Storytelling
- Risk Analysis & Customer Segmentation

CERTIFICATIONS

- IBM – Excel Basics for Data Analysis (98.35%)
- IBM – Introduction to Data Analytics
- Data Analytics Essentials – Coursera
- HackerRank – SQL Certification
- HackerRank – Python (Basic) Certification
- Illinois Institute of Technology – Data Science & Machine Learning
- Quantium – Data Analytics Job Simulation (Forage)
- Datacom – Introduction to Cloud Job Simulation

TECHNICAL SKILLS

- **Programming & Query Languages:** Python, MySQL, PostgreSQL, C#, .NET Core
- **Data Analysis & Machine Learning:** Pandas, NumPy, Scikit-learn, Random Forest, Supervised Learning, Feature Engineering, Model Evaluation, Predictive Modeling
- **Data Visualization & BI Tools: Power** BI, Microsoft Excel (Advanced), Power Query, Pivot Tables, Matplotlib, Seaborn
- **Databases & Big Data: MongoDB**, Hive, Hadoop, Relational Databases, NoSQL
- **Tools & Platforms:** Jupyter Notebook, Google Colab, Git, GitHub, Anaconda, Kaggle
- **Analytical Concepts:** Statistical Data Analysis, Hypothesis Testing, Data Mining, Data Integration, Data Quality, Data Warehousing, Data Lakes, Forecasting, Anomaly Detection

PROFESSIONAL EXPERIENCE

Data Science Intern | HulkHire Tech | Remote | Mar 2025 – Jul 2025

- Performed data extraction and advanced SQL querying on employee and sales datasets.
- Conducted data cleaning, transformation, and exploratory data analysis using Python (Pandas, NumPy).
- Developed interactive Power BI dashboards to visualize trends, pricing strategies, and business KPIs.
- Built a binary classification model (Kyphosis Prediction) using machine learning techniques.
- Generated analytical reports highlighting salary distribution, product performance, and customer insights.

Data Analytics Intern |NoviTech R&D Private Limited | Remote | Nov 2024 – Feb 2025

- Analyzed structured and semi-structured datasets using Excel, SQL, Python, and Tableau.
- Designed KPI dashboards to monitor operational and financial performance metrics.
- Applied ETL processes including data cleaning, validation, and transformation.
- Implemented predictive modeling techniques as part of analytics training projects.
- Presented data-driven insights to stakeholders.

Programmer (.NET Developer) | G2G Technologies | Nov 2020 – Mar 2021

- Developed applications using C# and .NET Core.
- Managed SQL databases and supported reporting & analysis tasks.
- Applied analytical problem-solving to optimize system performance.

KEY PROJECTS

Credit Card Fraud Detection using Machine Learning

- Developed a Random Forest classification model achieving 86% accuracy and 93% precision.
- Addressed class imbalance challenges and proposed SMOTE implementation for improved recall.
- Tools: Python, Pandas, NumPy, Scikit-learn, Seaborn.

Loan Approval Prediction

- Built a supervised learning model to predict loan approval outcomes.
- Performed feature engineering and exploratory data analysis to improve prediction performance.
- Tools: Python, Scikit-learn, Pandas.

Bank Loan Performance Analysis (Power BI Dashboard)

- Analyzed borrower attributes, loan characteristics, and repayment patterns.
- Designed interactive KPI dashboards to track credit risk and portfolio performance.
- Tools: Power BI, Excel, ETL processes.

E-Commerce Customer Churn Analysis

- Identified key churn drivers using SQL and Excel analysis.
- Conducted customer segmentation and behavioral analysis.
- Provided retention strategy recommendations.

Airbnb NYC Data Analysis

- Conducted univariate and multivariate data analysis.
- Visualized pricing trends, room types, and host activity using Python.
- Delivered actionable insights for business decision-making.

Healthcare Data Analysis & Insights

- Analyzed patient health profiles and cost patterns.
- Applied statistical analysis and data transformation techniques.
- Generated insights to improve resource allocation and operational efficiency.

Marketing Campaign Performance Analysis

- Evaluated campaign ROI, acquisition cost, and conversion metrics.
- Performed customer segmentation and channel performance analysis.
- Delivered strategic recommendations for marketing optimization.

EDUCATION

- **Data Science & Machine Learning**
  Entri Elevate | Jun 2024 – Jan 2025

- **Master of Engineering (Computer Science & Engineering)**
  Francis Xavier Engineering College | 2017 – 2019 |

- **Bachelor of Engineering (Computer Science & Engineering)**
  Bharath Niketan Engineering College | 2008 – 2012|

ADDITIONAL LEADERSHIP & KNOWLEDGE SHARING

Founder – *PM DATA LAB* (YouTube Channel)

- Create tutorials on Excel, Power BI, Python, SQL, and core Data Analytics concepts.
- Simplify complex data topics for aspiring analysts and data professionals.
